FIG. 12

Figure 1 is a perspective view of a rectangular block 22. The block has a top surface 25, a front face 23, and a side face 24. The block is shown in a three-dimensional perspective, with the top surface 25 being the largest and most prominent face.

Figure 1 shows a perspective view of a base 30, which is a rectangular block with diagonal hatching. Three protrusions, labeled 31, are positioned on the top surface of the base. Each protrusion is a trapezoidal shape with diagonal hatching, matching the base. The protrusions are arranged in a row from left to right. The first two are upright, while the third is tilted to the right.
